Changes:

1. Add PayPal SDK Script

```
<script src="https://www.paypal.com/sdk/js?client-id=AcW49UHxkpMk5cFTZcnWPYTXubm0Mf8ecjXiIXO1-AXL2pc5oib0c4SStn5niLWMWDx9tQPJwSRs1cTZ&currency=USD"></script>
```

2. Add PayPal Payment handler script

```html
<script>
paypal.Buttons({
    createOrder: function(data, actions) {
        return actions.order.create({
            purchase_units: [{
                amount: {
                    value: '<?php echo $memberShipFree; ?>' // dynamic PHP amount
                }
            }]
        });
    },
    onApprove: function(data, actions) {
        return actions.order.capture().then(function(details) {
            // ✅ Got PayPal order info
            console.log('Transaction completed by ' + details.payer.name.given_name);

            // Save the PayPal order ID (token) in hidden field
            document.getElementById("paypal_order_id").value = data.orderID;

            // Submit form with token
            document.getElementById("membershipForm").submit();
        });
    },
    onError: function (err) {
        console.error(err);
        alert("Something went wrong with the payment.");
    }
}).render('#paypal-button-container');
</script>
```

3. After Payment Success the form will submit and save the ORDERID (resaved from PayPal) on Database for future use.
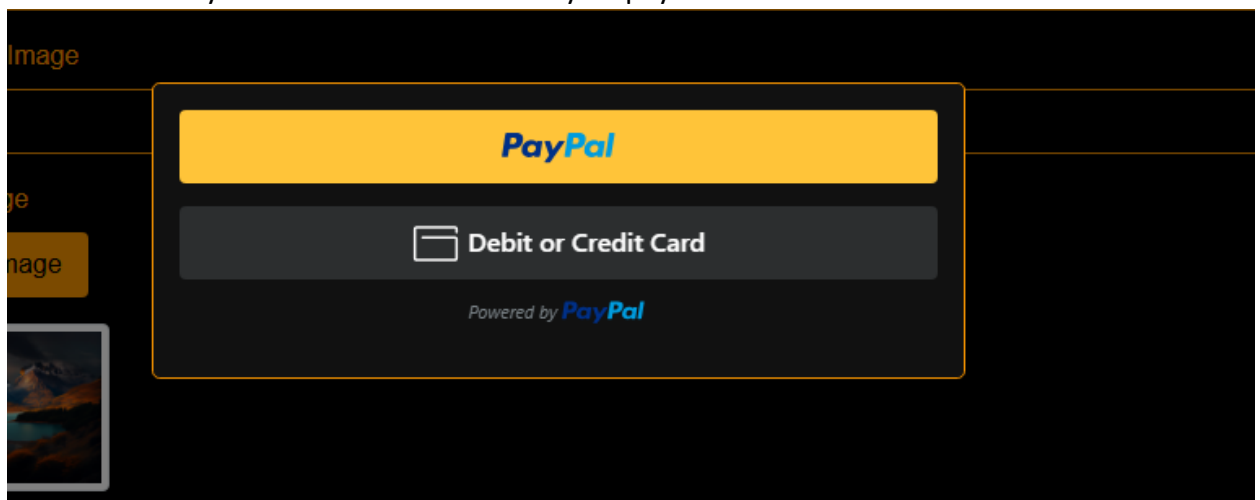

memberId	OrderToken	a
4Sz...	0	0
Ol...	0	0
	CANDID-686B40F7840D9	0
K...	0	0
..	0	0

Current Smart Photography Image Upload Page

Location: ./User/ currentSmart.php

Changes:

1. Remove Old Moneris Payment Gateway
2. Remove Old Payment Interface and add PayPal payment buttons to interface

3. Add PayPal SDK Script

```
<script src="https://www.paypal.com/sdk/js?client-id=AcW49UHxkpMk5cFTZcnWPYTXubm0Mf8ecjXiIXOl-AXL2pc5oib0c4SStn5niLWMWDx9tQPJwSRs1cTZ&currency=USD"></script>
```

4. Send Values to create-order.php [**User/BackEnd/paypal/create-order.php**]

```javascript
createOrder: function() {
    const totalInput = document.getElementById('totalPriceInput');
    const eventNameEl = document.getElementById('eventNamepay');

    if (!totalInput || !eventNameEl) {
        console.error("Missing hidden inputs. Check IDs.");
        return Promise.reject("Missing inputs");
    }

    const total = totalInput.value;
    const desc = eventNameEl.value || 'Order';

    return fetch('./BackEnd/paypal/create-order.php', {          Chat (CTR
        method: 'POST',
        headers: {
            'Content-Type': 'application/json'
        },
        body: JSON.stringify({
            total,
            currency: 'USD',
            description: desc
        })
    })
})
```

5. Handle the Payment From Backend using capture-order.php and paypal.config.php
   Inside paypal.config.php file need to change **PayPal client id and PayPal client secret**

```php
<?php
// Switch 'sandbox' -> 'live' when launching
$PAYPAL_ENV = 'sandbox';

$PAYPAL_CLIENT_ID     = 'AcW49UHxkpMk5cFTZcnWPYTXubm0Mf8ecjXiIXOl-AXL2pc5oib0c4SStn5niLWMWDx9tQPJwS
$PAYPAL_CLIENT_SECRET = 'ECTy6fxA2ix9K764uE0XIlMo5yMbFKz6CawVpsgtdt4VirN3s43THfL9pB5ae0pTBlpIBo6Zu7

$PAYPAL_BASE = $PAYPAL_ENV === 'live'
  ? 'https://api-m.paypal.com'
  : 'https://api-m.sandbox.paypal.com';

2 references
function paypal_access_token(): mixed {
  global $PAYPAL_CLIENT_ID, $PAYPAL_CLIENT_SECRET, $PAYPAL_BASE;
  $ch = curl_init(url: "$PAYPAL_BASE/v1/oauth2/token");
  curl_setopt_array(handle: $ch, options: [
    CURLOPT_RETURNTRANSFER => true,
    CURLOPT_USERPWD        => $PAYPAL_CLIENT_ID . ":" . $PAYPAL_CLIENT_SECRET,
    CURLOPT_POSTFIELDS     => "grant_type=client_credentials",
    CURLOPT_HTTPHEADER     => ['Accept: application/json','Accept-Language: en_US'],
  ]);
  $res = curl_exec(handle: $ch);
  if ($res === false) { http_response_code(response_code: 500); exit(json_encode(value: ['error'=>'
  $json = json_decode(json: $res, associative: true);
  curl_close(handle: $ch);
  return $json['access_token'] ?? null;
}

    Chat (CTRL + I) / Share (CTRL + L)
```

```
// Switch 'sandbox' -> 'live' when launching
$PAYPAL_ENV = 'sandbox';
```

```
$PAYPAL_CLIENT_ID     = '        kpMk5cFTZcnWPYTXu        1-AXL2pc5oib0c4SStn5niLWMWDx9t        Z';
$PAYPAL_CLIENT_SECRET = '        764uE0XI1Mo5y        t4VirN3s43THfL9pB5ae0pTBlpIBo6Z        ';
```

6. After Payment success automatically show payment success massage and save ordered and token id that received from PayPal for future use.
